

Creating a subcontractor vehicle and depot

Modified on: Thu, 29 Nov, 2018 at 10:30 AM

Creating a subcontractor vehicle

1. Select a subcontractor from the **Company** drop down
2. Click the **+ Vehicle** button
3. Optionally edit the vehicle name
4. Click **Save**
5. The subcontractor's vehicle is now an option when allocating bookings to vehicles

❗ Only internal users can create company records and require the **Super User** task **Client Company Maintenance** and **Companies - Allow Adding Subcontractor Vehicles**

Creating a subcontractor depot

If goods are delivered to a subcontractor before they go to their final destination, you can create a depot for them which will become an extra drop off location when allocating jobs to vehicles. Selecting their depot during vehicle allocation will automatically insert an extra movement into a booking.

1. Select a subcontractor from the **company drop down**
2. Click the **+ Depot** button
3. Click **Save**
4. The subcontractor's depot is now an optional dropoff location when allocating bookings to vehicles
